Overview

The Community Development Financial Institutions Fund (CDFI Fund) received 208 Allocation Applications, requesting an aggregate total of $5 billion in allocation authority, through the calendar year (CY) 2020 Allocation Application round of the New Markets Tax Credit Program (NMTC Program). The CDFI Fund awarded $5 billion in allocation authority pursuant to the Taxpayer Certainty and Disaster Tax Relief Act of 2019 (Public Law 116-94), and made available for the NMTC program pursuant to the CY 2020 Notice of Allocation Availability (NOAA) published in the Federal Register on September 23, 2020.

This document is organized into two sections. The first section, Part I, describes the review process used by the CDFI Fund to evaluate the CY 2020 NMTC Program Allocation Applications. Part II provides information on the general characteristics of a highly ranked application.

Please note that although the procedures discussed in this document are applicable for the CY 2020 allocation round, these procedures may not apply to other allocation rounds. The CDFI Fund reserves the right to modify its policies, procedures, and/or evaluation criteria in future allocation rounds, consistent with the requirements specified in the corresponding NOAA and related application materials for that round.
Part I. Allocation Application Review Process

Step 1. Initial Application Review and Scoring (Phase 1)

- The CDFI Fund’s Phase 1 review process, for all eligible Applicants, required two reviewers to independently evaluate and score the Business Strategy and Community Outcomes sections of each application.

- Reviewers were professionals with strong credentials in community and economic development finance. Reviewers were selected based on a variety of factors, including their knowledge of community and economic development finance and experience in business or real estate finance, business counseling, secondary market transactions, or financing of community-based organizations.

- The CDFI Fund screened each reviewer to identify any potential conflicts of interest with Applicants. The CDFI Fund provided each reviewer with detailed descriptions of what constituted a conflict of interest, and each reviewer was required to sign a certification that all conflicts of interest had been disclosed to the CDFI Fund. Reviewers were also required to sign a confidentiality agreement stating that they would not disclose any information obtained from the CDFI Fund during the review process.

- Reviewers were trained by NMTC Program staff to prepare them for the review process. The reviewers were provided with instructions and guidance on how to evaluate and score applications.

- The reviewers were then randomly assigned to teams of two. Each reviewer evaluated and scored each assigned application independently from the other reviewer assigned the same application. Reviewers evaluated and scored two of the four application sections, the Business Strategy and Community Outcomes sections. The other two sections were evaluated by NMTC Program staff during Phase 2.

- Reviewers also evaluated applications with respect to two statutory priorities that provided Applicants with: (i) up to five additional points for demonstrating a track record of serving disadvantaged businesses or communities; and (ii) five points for committing to invest substantially all of the proceeds from Qualified Equity Investments (QEIs) in unrelated entities.

- To ensure consistency and accuracy with NMTC Program scoring guidelines, the evaluations by reviewers were analyzed by a team leader before submission. Team leaders were CDFI Fund staff. NMTC Program staff provided oversight of team leaders throughout the application review process.

- After each application was reviewed by the two Phase 1 reviewers, an analysis was conducted to identify anomalous base or section scores. An anomalous base score was deemed to have occurred when the difference between the two reviewer base scores, divided by the higher of the two base scores, was significant. An anomalous section score was deemed to have occurred when one reviewer’s section score varied significantly from the other reviewer’s section score. To
resolve anomalous scores, a third independent reviewer was used to evaluate and score the section or sections in order to determine whether the anomalous score should be replaced.

**Step 2. Panel Review and Recommendations (Phase 2)**

- In order to be considered highly qualified and eligible for further allocation award consideration, an application had to achieve in Phase 1: (i) an aggregate score of at least 40 points in each of the two scored application sections; and (ii) an aggregate base score (excluding priority points) of at least 85 points. Thus, for example, an application with a section score of 40 in the Business Strategy application section combined with a score of 38 in the Community Outcomes application section would not be considered highly qualified and therefore, would not receive further consideration.

- Of the highly qualified Applicants, those that were most highly ranked were considered for an allocation. In accordance with the NOAA, section V.C, highly qualified Applicants were ranked in descending order based on their aggregate scores under the Business Strategy and Community Outcomes application sections, inclusive of half of the priority points, and forwarded to an Allocation Recommendation Panel (the Panel) comprised of CDFI Fund staff.

- For each highly qualified application sent to the Panel, panelists reviewed application materials, including the Management Capacity, Capitalization Strategy, and Information Regarding Previous Awards sections, which were not scored in Phase 1. The Panel also reviewed information related to prior allocations (e.g. data from the CDFI Fund’s Awards Management Information System (AMIS), audited financial statements, supplemental information requested by the CDFI Fund, etc.), if applicable. In determining their award recommendation, Panelists considered, among other things: (i) any issues noted by the Phase 1 reviewers; (ii) the Applicant’s capacity to deploy and monitor NMTC investments; (iii) the Applicant’s track record of providing direct loans and/or equity investments; (iv) the existence of notable relationships and how such relationships will create benefits (i.e. cost savings, lower fees) for QALICBs or unaffiliated end-users; (v) whether clear and meaningful community outcomes are likely to occur and benefit Low-Income Persons and/or residents of Low-Income Communities, based on the Applicant’s pipeline projects, including the Applicant’s ability to track community outcomes; (vi) the Applicant’s investment decisions aligning with community priorities; (vii) the financial health and fee/compensation structure of the Applicant; (viii) the distribution of benefits among the investor, Community Development Entity (CDE) and Qualified Active Low-Income Community Business (QALICB); and (ix) the Applicant’s track record of raising QEIs. Panelists also considered the consistency of the Applicant’s past NMTC activities1 with prior Allocation Applications (if applicable), as well as the Applicant’s proposed commitments to provide Qualified Low-Income Community Investments (QLICIs) in Non-Metropolitan Counties and engage in innovative investments. The Panel recommended allocation awards based on $5,000,000,000 of allocation authority available for the NMTC Program for the CY 2020 allocation round. In making recommendations for an allocation award,

---

1In the case of Applicants (or their Affiliates) that are prior year Allocatees, the CDFI Fund reviewed the activities of the prior year Allocatees to determine whether the entity: (a) effectively utilized its prior-year allocations in a manner generally consistent with the representations made in the relevant allocation application (including, but not limited to, the proposed product offerings, QALICB type, fees and markets served); (b) issued QEIs and made QLICIs in a timely manner; and (c) substantiated a need for additional allocation authority.
panelists were not required to reach consensus and could recommend an allocation award amount up to the maximum amount requested by the Applicant.

- The CDFI Fund also reviewed a variety of compliance, eligibility, due diligence and regulatory matters including, among other things: (i) whether an Applicant or its Affiliates that have been awarded funds through other CDFI Fund programs were compliant with the assistance or award agreement; (ii) whether prior-year Allocatees successfully issued the minimum requisite QEIs and made the minimum requisite QLICIs from prior NMTC Allocations as specified in the NOAA; (iii) whether prior-year Allocatees were compliant with the requirements of past Allocation Agreements; (iv) for regulated financial institutions, information from the Applicant’s primary federal regulator; and (v) information related to the Assurances and Certifications section of the application. As specified in the NOAA, point deductions were applied in the case of prior CDFI Fund Awardees and Allocatees (or their Affiliates) that failed to meet reporting deadlines since the last application round.

- As stated in the application materials, any Applicant that was recommended for an allocation amount that was lower than the minimum acceptable allocation amount specified by the Applicant in Question 40 of the application would not be provided with an NMTC Allocation.

**Step 3. Initial Allocation Determinations**

- After all scoring anomalies were resolved and the Phase 2 review process was completed for the most highly ranked Applicants, the Panel’s recommended allocation amount for each application was forwarded to the Selecting Official.

- The Selecting Official made allocation determinations totaling the $5 billion in allocation authority made available for the NMTC Program under the CY 2020 NOAA. Allocation determinations were made in descending final rank score order until available allocation authority was exhausted.

- Generally, Applicants that did not receive an allocation and who scored highly enough to be considered by the Panel, include those found to be ineligible as well as those deemed to have exhibited significant deficiencies. For example, an Applicant may have misrepresented the Applicant’s (or Controlling Entity’s) track record of direct loans and/or equity investments, had a track record that did not support an allocation, demonstrated insufficient management capacity, failed to use prior NMTC allocation(s) in a manner that is generally consistent with the business strategy set forth in the Allocation Application(s) related to such prior allocation(s); or provided application responses that were contrary to the guidance provided in the Allocation Application materials, including the Application FAQ document.

- In the event that the Selecting Official’s decision reversed or varied considerably from the Panel’s recommended allocation amount, the Reviewing Official reviewed the application file and made the allocation determination.

**Step 4. Non-Metropolitan Commitments and Final Award Determinations**

- Next, as provided for in the NOAA, the NMTC Program staff reviewed the initial allocation determinations to ensure that: (i) the proportion of Allocatees that are Rural Community
Development Entities (Rural CDEs)² was, at a minimum, equal to the proportion of highly qualified Applicants that were Rural CDEs; and (ii) at least 20% of all QLICIs made by Allocatees under the CY 2020 allocation round would be invested in Non-Metropolitan Counties, based upon commitments made in their applications.

- The CDFI Fund reserved the right to make adjustments to the Allocatee pool to ensure these two objectives were met. With respect to the first objective (i) the CDFI Fund did not need to add any additional Rural CDEs into the Allocatee pool, as the proportion of CDEs in the final Allocatee pool (16%) exceeded the percentage of Rural CDEs within the highly qualified pool (14.2%).

- With respect to the objective to have at least 20% of all QLICIs made in Non-Metropolitan Counties, the CDFI Fund reserved the right to require Applicants to commit up to their stated “maximum,” as opposed to their stated “minimum,” commitment for investing in Non-Metropolitan Counties. For the CY 2020 allocation round, the CDFI Fund will require Allocatees to invest 80% of their maximum commitment in Non-Metropolitan Counties.

- Following this evaluation and methodology for ensuring Non-Metropolitan commitments, the CY 2020 NMTC Allocation awards were deemed final.

**Part II. General Characteristics of a Highly Ranked Application**

In order to receive a score in the highest range in each of the two scored application sections and receive the maximum Priority Points, an Applicant generally needed to demonstrate the following characteristics:

**A. Business Strategy**

1. **Products, Services and Investment Criteria (Application Questions 14-16).** The Applicant clearly demonstrated that its products will be significantly more flexible than market standards. For each product, the Applicant clearly described the circumstances under which and how frequently the best rates and terms would be available, and provided examples and comparisons to what is typically offered by the Applicant and offered by other financial institutions or investors in the Applicant’s service area. The Applicant provided an example of how each proposed product will be used to finance a projected NMTC investment. For all Applicants, except those solely offering Financial Counseling and Other Services (FCOS) or purchasing loans from other CDEs, the Applicant indicated (in Question 15) that 100% of its QLICIs will be provided in the form of equity; equity-equivalent financing; debt with interest rates at least 50% below-market; or debt that otherwise satisfies at least five indicia of flexible or non-traditional rates and terms, as specified under Question 14. Applicants investing in other CDEs demonstrated a high likelihood that they will pass favorable rates and terms along to the borrowers. Applicants purchasing loans from other CDEs committed to require the selling CDE to re-invest at least 95% of these proceeds as QLICIs and those loans purchased included rates, terms and/or conditions that would not be possible without the benefit of an NMTC Allocation.

---

¹ A CDE that has a track record of at least three years of direct financing experience, has dedicated at least 50% of its direct financing dollars to Non-Metropolitan Counties over the past five years, and has committed that at least 50% of its NMTC financing dollars with this allocation will be deployed in such areas.
2. **Projected Business Activities (Question 17 and Exhibit A).** The Applicant clearly demonstrated its ability to deploy QLICIs commensurate with the allocation request. If the Applicant proposed to fund a single or discrete number of projects, the Applicant demonstrated that it was highly likely that its proposed projects were feasible based on the ability to secure financing, that they would close as planned, that the risks to timely closing were limited and clearly identified, and that a superior risk mitigation plan was presented. If the Applicant proposed to fund a general pipeline in Question 17, the Applicant identified the total number of businesses or CDEs and total dollar amount of NMTC financing/investment to be provided, indicated what portion of the Applicant’s pipeline falls into different businesses types ((e.g. community facilities, retail, industrial, etc.) and activity types (e.g. loans to QALICBs, investments in CDEs, loan purchases from CDEs, etc). Based upon the details it provided for its pipeline projects in Question 17 and Table A5 (e.g. identified businesses, total QEI and QLICI to be provided, planned uses of financing, and projected closing date), and the credibility and reliability of its projections, the Applicant demonstrated it is likely to be able to begin making NMTC investments in a timely manner. The Applicant’s strategy for identifying borrowers, investees, and other customers in LICs is highly likely to result in the types of NMTC investments described in its general pipeline.

3. **Prior Performance (Questions 19-20, and Exhibit B).** The Applicant demonstrated an excellent track record of directly providing, during each of the past five years, products and services similar to those it intends to deploy with the QEI proceeds. An Applicant with a relatively limited track-record of QLICI-type activities could also score highly if it had a very strong five year (or longer) track record of non-QLICI like investments that were clearly relevant to its business strategy. Activities in which the Applicant had placed its own capital at risk were given greater weight over ancillary activities, such as loan packaging or facilitating transactions.

4. **Prior Performance and Projected Business Activity (Questions 13, 17, 19, 20, and Exhibits A and B).** The Applicant’s track record included providing loans or investments to similar business types. The Applicant demonstrated that its most recent 5-year direct financing track record was 90% or more of its projected NMTC deployment in Exhibit A.

**Notable Relationships (Question 23).** If the applicant described instances where the Applicant, Affiliates, personnel, governing board or advisory board will receive financial benefits from the QALICBs financed, the Applicant demonstrated that these relationships would provide clear benefits (e.g. cost savings, lower lease rates or fees) for unaffiliated end-users (e.g., QALICBs, tenant businesses, or residents) in Low Income Communities (LICs).

**B. Priority Points**

1. **Track Record of Servicing Disadvantaged Businesses and Communities (Questions 19-20 and Exhibit B).** The Applicant demonstrated five or more years of experience providing capital and/or technical assistance to disadvantaged businesses and communities (DBCs). The Applicant also demonstrated that at least 70% of its total dollar volume of direct financing activities has been provided to DBCs.

2. **Unrelated Entities (Question 22).** The Applicant indicated that it will commit to using substantially all of the proceeds of its QEIs to make QLICIs in one or more businesses in which persons Unrelated to the Applicant hold the majority equity interest.
C. Community Outcomes

1. **Targeting Areas of Higher Distress (Question 24).** The Applicant indicated that it will commit to providing at least 75% of its QLICIs in specified areas of severe distress and/or areas characterized by multiple indicia of distress. The Applicant also demonstrated that its strategy for locating and prioritizing QLICIs in highly distressed communities is highly likely to be effective.

2. **Community Development Outcomes (Question 25).** For each outcome selected in Question 25, the Applicant demonstrated that its planned investments are likely to result in significant community outcomes that would clearly benefit Low-Income Persons and/or residents of LICs. All of the Applicant’s projected community outcomes are quantified and supported by sound and clearly explained methods. The Applicant demonstrated that it validated the reasonableness of the quantified projections with metrics obtained from or informed by third party source(s), where required based on the outcomes selected. In addition, the Applicant demonstrated a strong track record of achieving outcomes similar in type and quantity to the projected outcomes.

3. **Tracking Community Outcomes (Question 25b).** The Applicant described a thorough track record and robust methodology for tracking all projected community outcomes.

4. **Community Accountability and Involvement (Question 26).** The Applicant showed that proposed investments are supported by and beneficial to the communities it serves by outlining an effective process, including a significant role for LIC representatives on its Advisory and/or Governing Board, to ensure planned investments align with LIC priorities. The Applicant also demonstrated an extensive track record of project-specific community engagement in past investment decisions and how its proposed investments will contribute to broader (local, regional, or state-wide) community or economic development strategies or plans.

5. **Other Community Benefits (Question 27).** The Applicant demonstrated a high likelihood that its proposed investments will result in additional non-NMTC related private investment in LICs beyond the initial NMTC investment, as supported by specific track record examples of financing catalytic projects that have spurred additional private investment.
