# Getting Started

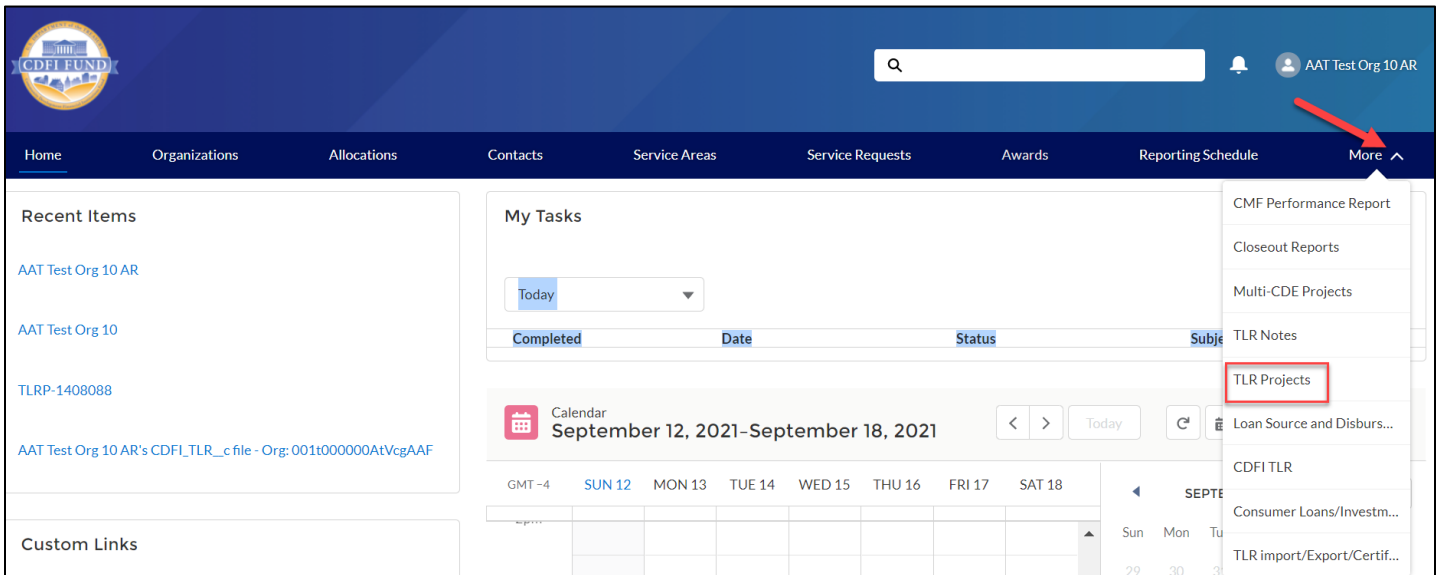

Transaction Level Reports are now in the CDFI Fund's Awards Management Information System (AMIS). For an overview of the data field changes made, review the "CIIS to AMIS Crosswalk NMTC TLR" guide.

AMIS provides two ways users can create their Transaction Level Report (TLR):

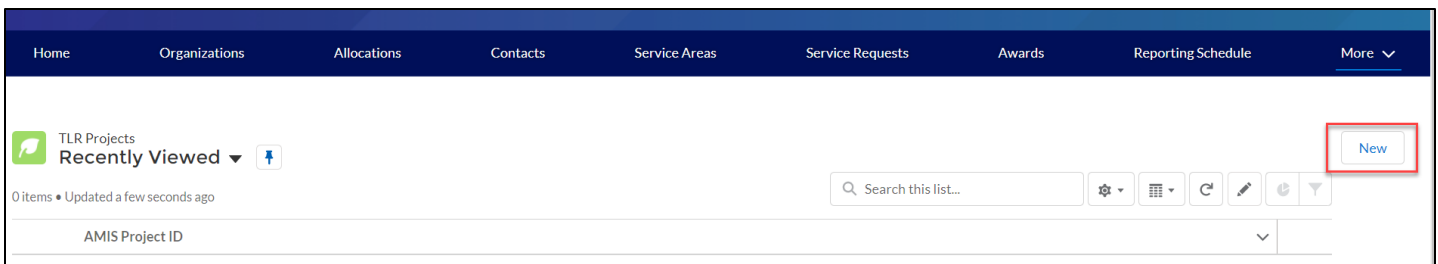

- Manual entry of your Transaction Level Report (TLR) through the AMIS User Interface (UI)
- Upload of multiple TLR records through either a CSV file template or an XML schema

## Manual Entry

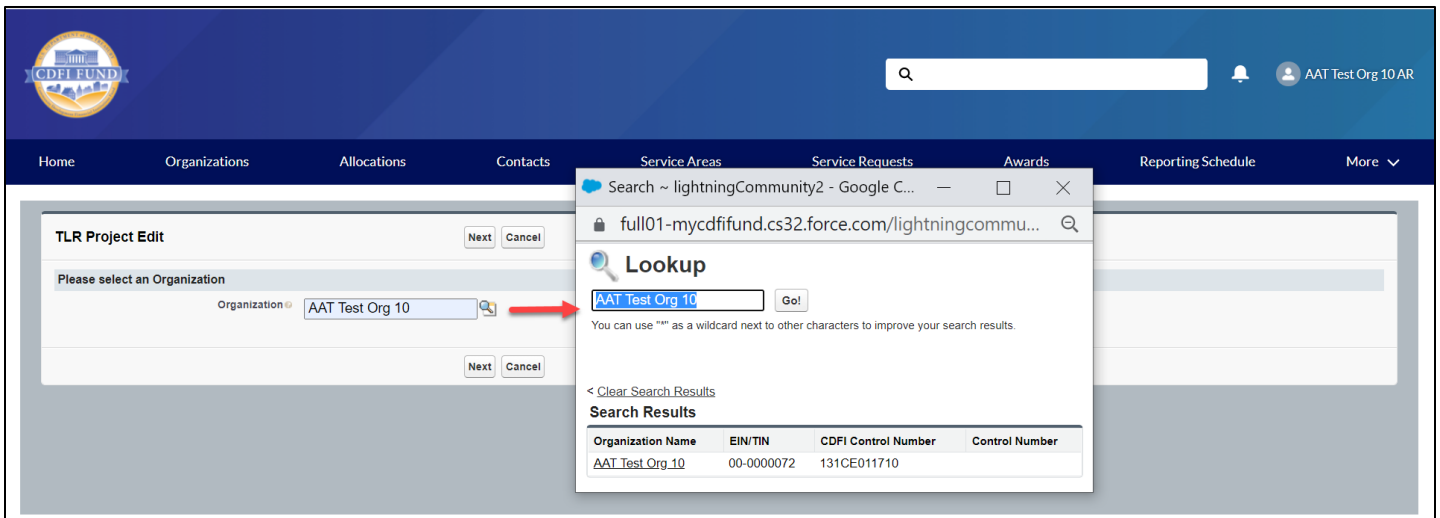

To manually begin your Transaction Level Report (TLR), log into AMIS and click on the TLR Projects tab located in the "More" dropdown.

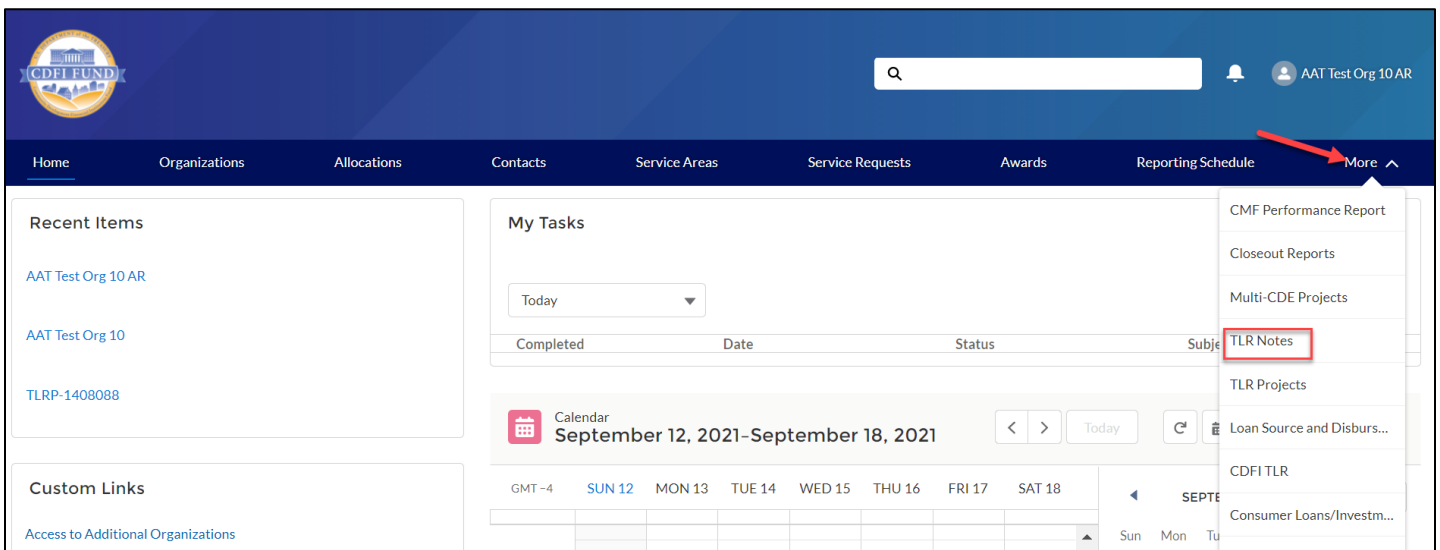

Once on the TLR Projects Tab, click the "New" button.

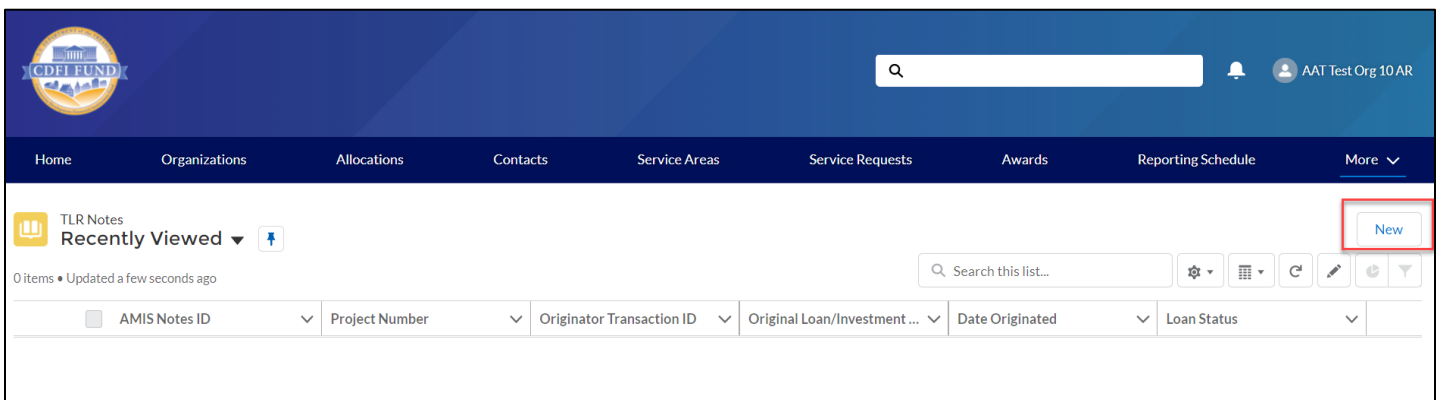

Enter the name of your organization in the "Organization" field and click "Next" to go to the TLR Project detail page to fill out the information based on the Data Points listed in the guide. You can click the search icon to search the list of organizations you are permitted to access.

Once you have completed and saved your TLR Project record, click on the TLR Notes Tab located in the “More” dropdown.

Click the “New” button. Fill out the information based on the Data Points listed in the guide.

Once you have finished filling out and saving your TLR Note record, scroll down the page to the Loan Source and Disbursements related list (located on the TLR Note record – Related Tab). Click the “New” button. Fill out the information based on the Data Points listed in the guide.

## CSV File Upload

To create multiple TLR records at one time, AMIS allows users to upload CSV files to load via a file import graphic interface. Click on the "TLR Import/Export/Certify" tab in the menu bar to get started.

**Note:** Please use the “General” cell formatting for CSV file uploads.

**Note:** Since templates change from time to time, it is always best practice to download new templates before beginning a file upload process.

The screenshot shows a web interface with a 'Clear Rows' link at the top left, indicated by a red arrow. Below it, a red text label reads 'Errors (6 errors / 6 total) +'. To the right is a 'Download Errors' link. A table with 5 columns (Error Row, Unique Id, Error Message, Field, Actions) displays three rows of errors. Each row has an 'Update Field' button and a 'Remove Row' button. A red arrow points to the 'Remove Row' button for the first error row.

## XML File Upload

To create multiple TLR records at one time, AMIS allows users to upload files using an XML schema. To get started click on the "TLR Import/Export/Certify" tab located in the "More" dropdown.

Use the "Organization Name" field to enter the name of the organization for which you are submitting TLR records. You may also select the Organization Name from a list by clicking on the search icon next to the "Organization Name" field and choosing from a list of organizations you are permitted to access.

Click the "NMTC\_TLR\_Xml\_Schema.xsd" link to download the XML Schema to use when generating an XML file. XML attribute names contain no spaces but are otherwise identical to the corresponding data guidance field name.

To submit updates to existing projects, click the "Update\_NMTC\_TLR\_Data.xml" link to download an XML file of current project data already in AMIS. The update template will contain a list of existing TLR Projects that are within the

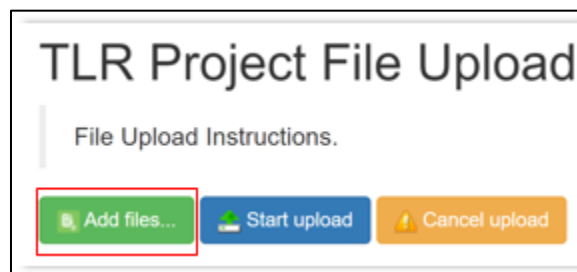

7-year update window along with their annually updatable fields. Please note that only fields marked as “Annual Update Required” in the Allocatee TLR Data Point Guidance document, are required or allowed to be updated.

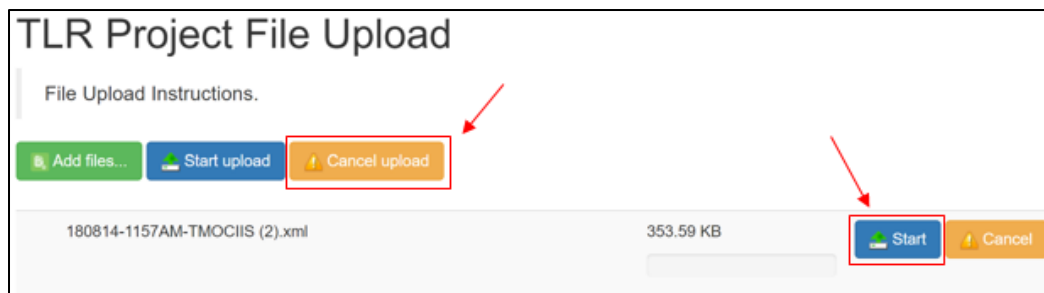

After you fill out and save the file, back on the AMIS portal, click the "Import\_XML\_NMTC\_TLR" link.

Click on “Add Files” and select the document to be uploaded.

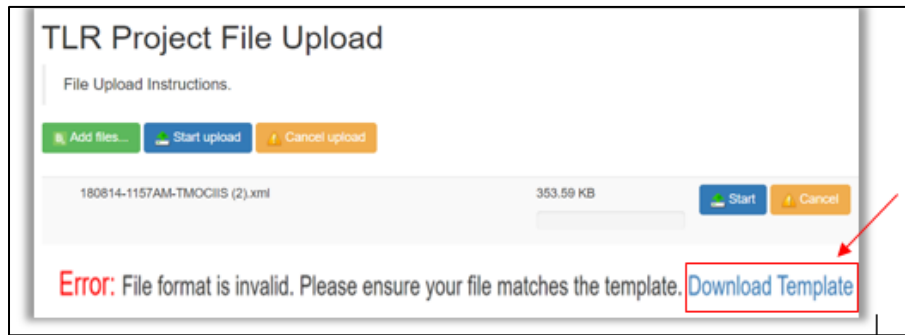

The upload document must be formatted in Extensible Markup Language (.xml). If the wrong file is selected in error, click on “Cancel Upload.”

1. Once the correctly formatted document is selected, click on “Start Upload”

2. If the uploaded file is in the wrong format or uses an outdated template, AMIS will automatically generate an error message and provide the user with the correct template. Click on “Download Template,” transfer TLR data on to the new template and resume the upload process.

3. The correct template can also be found by navigating to Import/Export/Certify tab and clicking on “New\_NMTC\_TLR\_XML\_Schema.xsd.”

4. Follow the steps 4 through 10 outlined above in the CSV File Upload section.

# Certifying TLRs

To certify your TLRs, navigate to the “TLR Import/Export/Certify” tab and enter the name of your organization. The earliest Fiscal Year available for certification will be displayed next to the Certification buttons.

Starting August 2020, users have the option to certify data when the data is available -- prior to the reporting due date -- by using the “Interim Certification” button. Once all TLR records for a fiscal year are Interim Certified, users are required to close out the certification window for that fiscal by using the “Final Certification” button.

## Interim Certification

To certify records as you go throughout the fiscal year, use the “Interim Certification” button. Users can continue to add records after Interim Certification.

The screenshot shows the 'Organization' section of the AMIS interface. It includes a navigation bar with links: Home, Organizations, Allocations, Contacts, Service Areas, and Service Requests. Below the navigation bar, the 'Organization' section displays 'Organization Name: AAT Test Org 1' with a 'Change Organization' button. There are two buttons: 'Interim Certification' (highlighted with a red underline) and 'Final Certification'. To the right of these buttons is a text input field for 'Fiscal Year to Certify-NMTC:'. Below the 'Interim Certification' button is another button labeled 'Certify CDFI TLR'. To the right of this button is a text input field for 'Fiscal Year to Certify-CDFI:'.

Please Note:

- Each TLR Project must have an active Note to be considered for Interim Certification.
- Each TLR Project must have at least one Address to be considered for Interim Certification
- Each TLR Note must have at least one Loan Source and Disbursement.

If a Project or Note record is missing any of these requirements, AMIS will not certify the records.

Upon clicking the “Interim Certification” button, AMIS pulls all the records that meet the prescribed criteria and runs a final check on the data to ensure that all records meet the data validation rules.

The system counts the following:

- The number of records that have been Interim Certified for that reporting period;
- The number of records that have been submitted but not Interim Certified;
- The number of records that have been submitted but did not pass the validation check (records with errors); and
- The number of records that will be Interim Certified if the user decides to proceed with certification (records without errors).

The screenshot shows a confirmation dialog box with the following text: 'You have already certified **45 records** for reporting period 2019'. Below this, it says: 'You have **0 TLR Projects, 0 TLR Addresses, 0 TLR Notes and 0 TLR Loan Source and Disbursements** that are yet to be certified. **0** of your records have errors.' Then it asks: 'Are you ready to certify the **0 records** without errors?'. There are two buttons: 'Yes' and 'No'. At the bottom, there is a button labeled 'Download Certification Preview'.

Users have the option of previewing the data compiled by AMIS before certification by clicking “Download Certification Preview.” The first column of the preview file shows the status of a given record. If a record failed a validation, the file shows the data field that caused the record to fail and the validation rule that was not met. To proceed with Interim Certification, click “Yes” when asked if you are ready to submit the records without errors. Users will then be directed to the certification statement page and once they click “Certify NMTC TLR” all submitted TLRs that passed the validation check (all submitted records without errors) will be Interim Certified.

<p>Prior to the CDFI Fund accepting the data submitted by a Recipient/Allocatee, the user must certify, on behalf of the organization, to the following:</p> <p>1) The person(s) entering the data and making these certifications has been authorized, by the organization for which the data is input, to enter the data and make the certifications on its behalf.</p> <p>2) Any information or data being provided to the CDFI Fund that is input in the Awards Management Information System (or other submission method) pursuant to the reporting requirements of the Assistance Agreement(s) or Allocation Agreement(s) ("Agreement(s)") is true, accurate, and complete, and accurately represents the activities and/or performance of the organization for which the data is input.</p> <p>3) The organization remains compliant with all applicable assurances and certifications, representations and warranties, and covenants and agreements as agreed upon in the Agreement(s) for which this data is being input or, alternatively, has notified the CDFI Fund of the organization's inability to remain compliant with such provisions of the Agreement(s) through the submission of a Material Event notification (as described in the Agreement(s)) or other communication to the CDFI Fund.</p> <p><input type="button" value="Certify NMTC TLR"/></p>

## **Final Certification**

Final Certification for the NMTC TLR is due 180 days after the end of an Organization’s Fiscal Year. Final Certified TLR records will be locked from any editing. The status of the TLR Report as reflected in the AMIS Reporting Schedule (i.e., “Submitted,” “Pending Receipt”, “Submitted-Overdue” etc.) is determined on the date the user runs the “Final Certification” process. The “Final Certification” process closes out the Fiscal Year for any further certification.

Final Certification involves both the reporting of new transactions and changes to the “Annual Update Fields” for “active” transactions that were reported in the prior year.

***Note: Once Final Certification has been processed, users can no longer submit/certify records for a given Fiscal Year.***

## Annual Update Fields

At the beginning of an Organization's fiscal year, the TLR records that were entered and certified in previous fiscal years will be unlocked so that the user can update "Annual Update" fields (these are the only fields the user will be able to successfully edit). Once users have made the appropriate annual updates to their TLR records, they will be able to proceed with Interim Certification and Final Certification of the TLR. Again, after Final Certification, all the records will be locked from editing until the next fiscal year.

Object	Annual Update Fields
TLR Project	-Actual Jobs Created (Construction) -Actual Jobs Created (Financed) -Actual Jobs Created (Tenant) -Annual Gross Revenue (Reporting Period) -Blended Interest Rate -Comparable Blended Interest Rate
TLR Note	-Amount Charged Off -Amount Recovered -Days Delinquent -Interest Rate -Loan Status -Number of 60 Days or More Delinquent -Number of Times the Loan Restructured -Original Loan/Investment Amount -Principle Balance Outstanding -Term -QLICI Level

There are three ways to update existing records.

1. Manually update each record from the User Interface (UI).
2. Use the CSV file upload functionality. See below for directions.
3. Use the XML file upload functionality. See below for directions.

### CSV Upload Functionality

1. Go to the TLR Import/Export/Certify Page.
2. Search for the organization you are associated with and download the two update templates called Update\_NMTC\_TLR\_Project.csv and Update\_NMTC\_TLR\_Note.csv.

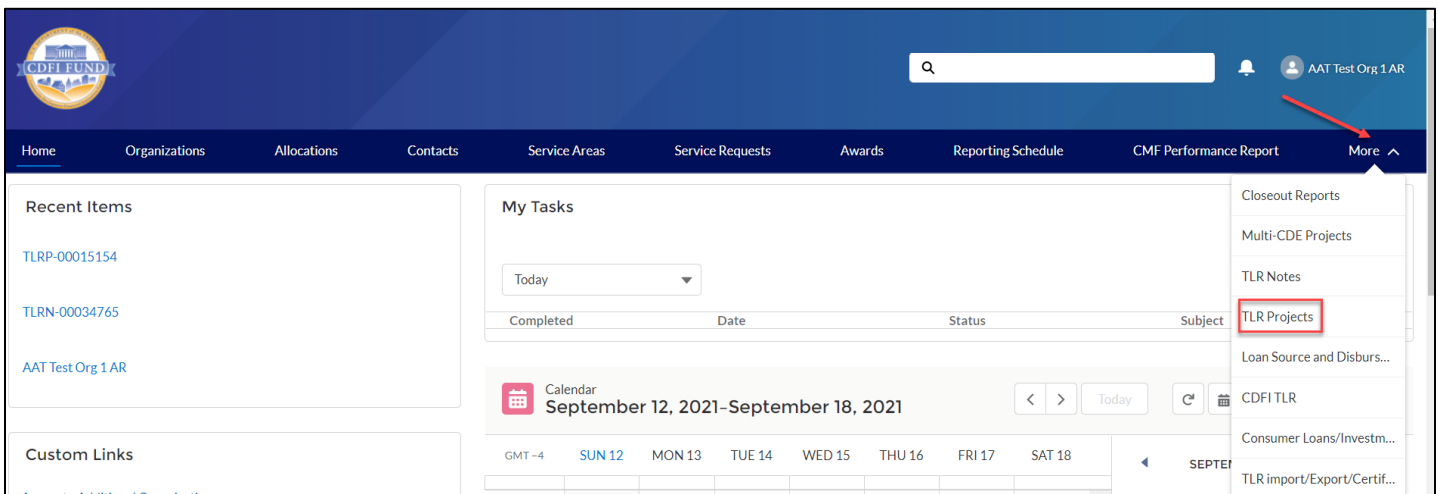

3. Make any necessary modifications to the records on each template.
4. Upload your updates using the import NMTC TLR Project Update and Import NMTC TLR Note Update import data links. The rest of the process follows the regular CSV File Upload process.

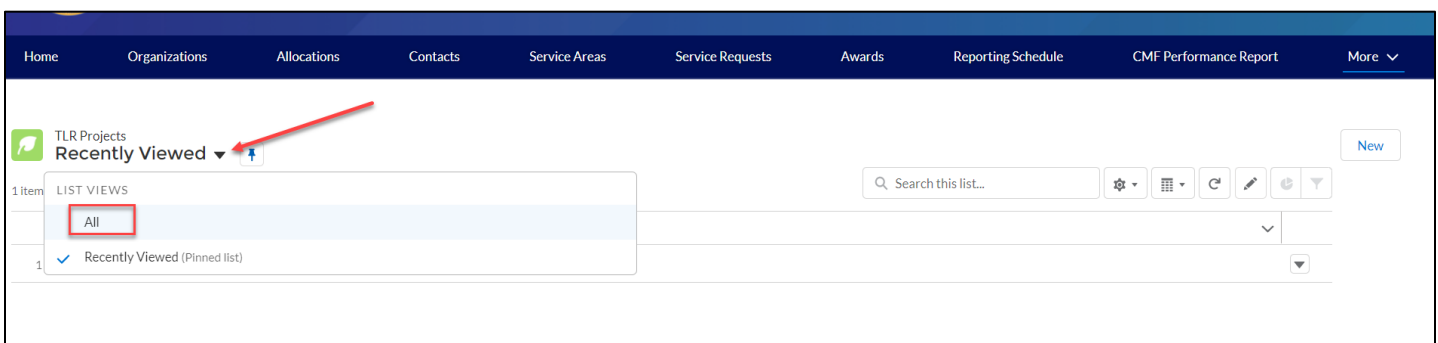

## XML Upload Functionality

Updates are also possible through the XML File Upload process on the TLR Import/Export/Certify Page, using the Update NMTC TLR Data.XML template and the Import XML NMTC TLR link

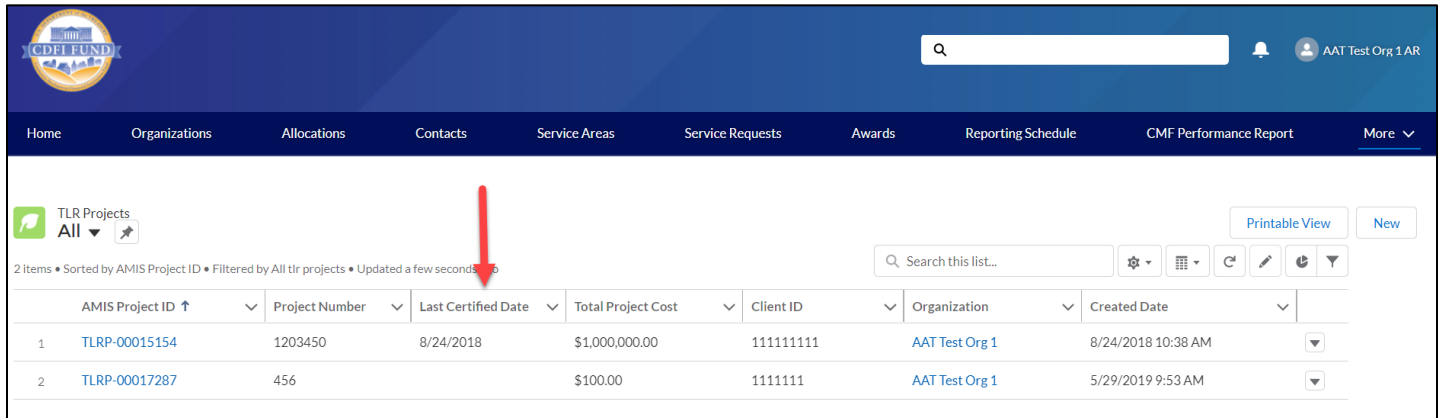

To check whether a TLR Project has successfully been certified (i.e. has undergone Final Certification), navigate to the “TLR Projects” tab located in the “More” dropdown.

Select “All” from the “View” list.

All TLR Project that have successfully passed through Final Certification will have a date displayed under “Last Certified Date.”

The screenshot shows the CDFI FUND AMIS system interface. The top navigation bar includes links for Home, Organizations, Allocations, Contacts, Service Areas, Service Requests, Awards, Reporting Schedule, CMF Performance Report, and More. The main content area displays a table of TLR Projects. A red arrow points to the 'Last Certified Date' column header. The table contains two rows of project data.

	AMIS Project ID ↑	Project Number	Last Certified Date	Total Project Cost	Client ID	Organization	Created Date
1	<a href="#">TLRP-00015154</a>	1203450	8/24/2018	\$1,000,000.00	111111111	<a href="#">AAT Test Org 1</a>	8/24/2018 10:38 AM

*Note: If you happen to have performed Final Certification in error (i.e. you have additional records you need to submit), please contact the AMIS Help Desk at [AMIS@cdfi.treas.gov](mailto:AMIS@cdfi.treas.gov) for further assistance.*

# What's New in the NMTC Allocatee TLR Guidance?

## **New Data Points**

The NMTC TLR Project has two new data fields. These fields are intended to capture investments resulting from CDE-to-CDE loans. In cases where NMTC Allocatees invest in other CDEs, Allocatees are required to report the initial loan to the other CDE and the subsequent investments from the loan-receiving CDE to QALICBs. These new data fields are intended to help the Fund differentiate between the initial CDE-to-CDE loan and the subsequent CDE-to-QALICB loan.

- Project results from Investment CDE – This is a Yes/No data field asking if the Project being reported is a result of an initial CDE-to-CDE loan.
- Associated Project – If the answer to the above data point is ‘Yes’, then the user will be asked to enter the AMIS Project ID (i.e. the TLRP number) of the related CDE-to-CDE Project.

## **Changes to Existing Data Points**

Deleted fields:

- Disbursement ID – This data point has been removed from the Loan Source and Disbursements related list.
- Disbursement Amount – This data point has been removed from the Loan Source and Disbursements related list.
- Legacy ID – This data point has been removed csv upload template.

## **New User Features**

- Generating NMTC Reports – Users will now have the option of generating customized reports of TLR records in AMIS. Guidance on how to create reports are provided in the section below.
- CSV/XML File Upload Error Correction Process – Users will now have to ability to make corrections to their TLR files as part of the upload process. A new Error Correction user interface assists users in resolving errors in their upload files. Guidance on how to use the Error Correction process is provided in the Getting Started section of this document under the CSV File Upload and XML File Upload sub-sections.
- Address Look-up – Address reporting in AMIS now includes an ESRI call-out feature that automatically verifies and geocodes addresses entered into the system. More information regarding the new feature is included in the TLR Address reporting section of the document.

# Generating NMTC Reports

1. To generate TLR Reports, log into the CDFI Fund's Awards Management Information System (AMIS) and click on the "Organizations" tab.

2. Find the Organization whose reports you want to view and click on the link.

3. Once on the Organization page, scroll to the bottom of the details and locate the 'Custom Links' section. Links to available reports will be listed in the section.

4. Left click on the report you would like to generate.

The report generates in a new window with all records that meet the report's built-in criteria. Customization is not possible at this point.

The report provides a Printable View button and an Export Details button

# Understanding the Data Point Boxes

Below is a diagram of how to read and understand the data point boxes listed in the section [CDE Transaction Level Report – Data Point Guidance](#).

Each data point is color-coded according to its related requirements.

	Purpose of Color Coding
	Mandatory – A response <b>must</b> be provided or the TLR will not be accepted.
	Conditionally Required – This field will become enabled and require an answer based on a response in a previous field.
	Optional – Not required to provide a response although it is recommended.
	AMIS System Generated – User response is not allowed.

### Example 1:

This section will let you know when a field is mandatory or conditionally required as well as provide a clear explanation on other validations associated with the data point

Some data points have pre-defined values that should be entered when working in excel. Each value that can be entered will be listed in the gray column. Users should report the value that best describes what their Organization is trying to report.

### **Who to contact for help**

If you are experiencing any difficulties with the data entry portion of your report, including document errors, system errors, and basic questions, please contact the AMIS Helpdesk. **The most effective means of requesting support is submitting a Service Request. From the AMIS Service Request tab, select the “Create New Service Request” button. Select “Continue” to accept the default record type of “General Inquiry”. Ensure that “NMTC-AMIS technical problem” is selected for the Type drop-down field.**

Alternatively, the Allocatee may send an email to [AMIS@cdfi.treas.gov](mailto:AMIS@cdfi.treas.gov). Please type, “NMTC: TLR Assistance Needed” in the subject line of the email. A technical support staff person will generally reply within 24 hours on weekdays. Allocatees may also phone the CDFI Fund IT Help Desk at (202) 653-0422. If a technical support staff person is unavailable to immediately assist, please leave a message and a staff person will return the call within 36 hours on weekdays.

## Date Formatting

The most common fix is to make sure the date column is formatted correctly. When entering an answer into a cell that requires a date, make sure to format the cell as below. This can be done by right clicking on the cell(s). Although it may not fully appear as if it is in the correct format (March 3, 2014 will appear as 3/3/2014 as opposed to 03/3/2014), rest assured, this is correct.

The screenshot shows the 'Format Cells' dialog box with the 'Date' category selected. The 'Type' list includes several date formats, with '\*3/14/2012' selected. The 'Locale (location)' is set to 'English (United States)'.

# TLR Address

The CDFI Fund requires that Organizations confirm that all addresses are geocodable with a new ESRI verification process. If users enter an incorrect address, the new ESRI address verification process will send an error message informing users of the address accuracy score and a possible alternative to the entered address. Users will be required to correct and re-enter the address or an alternative location indicator. (Please see image below.)

Error Row	Unique ID	Error Message	Field	Actions
6		Invalid Investee Address - please check the Address and try again score: 96.340000000000003	Investee Street Address Line 1 3335 Landingview Road Investee City Lilburn Investee State GA Investee Zip Code 21044	<input type="button" value="Update Field"/> <input type="button" value="Remove Row"/>
7		Invalid Project Address: If the address is correct, please update the address to exactly match the ESRI result. If the ESRI returned address is not desired, please use a different address or replace it with just the XY coordinates. **X,Y Coordinates** – specify an exact geographic location using longitude and latitude. X,Y Coordinates should not be rounded, and AMIS requires that both the coordinates be reported to five (5) decimal points. The latitude and longitude can be found using a variety of tools such as a GPS, an address locator, or a map-based tool.

Example:

X Coordinate (Longitude, typically displayed as negative for continental US locations): **-77.04201**

Y Coordinate (Latitude, typically displayed as positive for continental US locations): **38.90397**

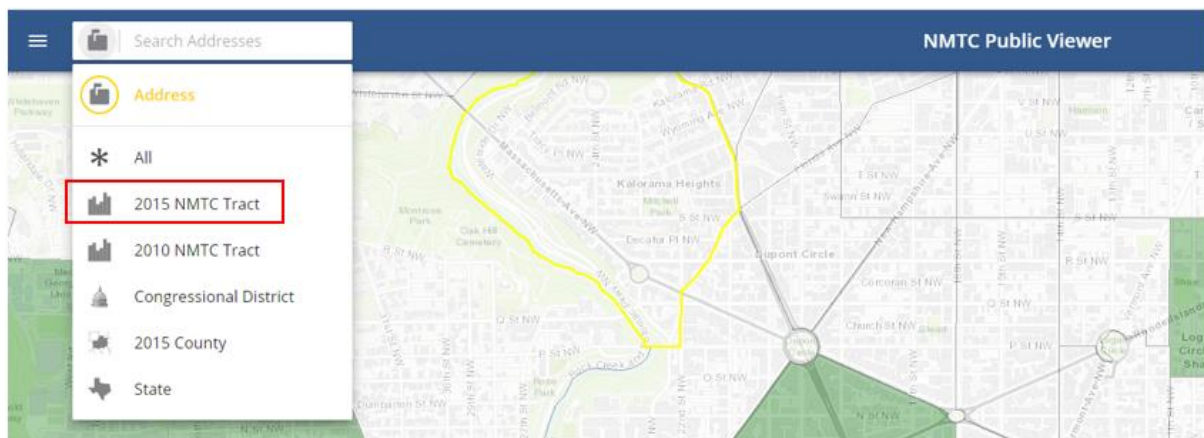

## **How to find a FIPS code and census tract data:**

The CDFI Fund offers the following guidance for obtaining a Federal Information Processing Standard (FIPS) code and/or maps for addresses that cannot be validated in CIMS:

1. Log in and open the CDFI Information Mapping System (CIMS) <https://www.cdfifund.gov/mapping-system>.
2. On the CIMS landing page that opens, under the Accessing the Mapping Software section, click on the button that says 'Public'.
3. On the next page that opens, choose the button labeled 'NMTC'.
4. By default, a map displays with a search box asking for an address—highlighted yellow in the screenshot below.

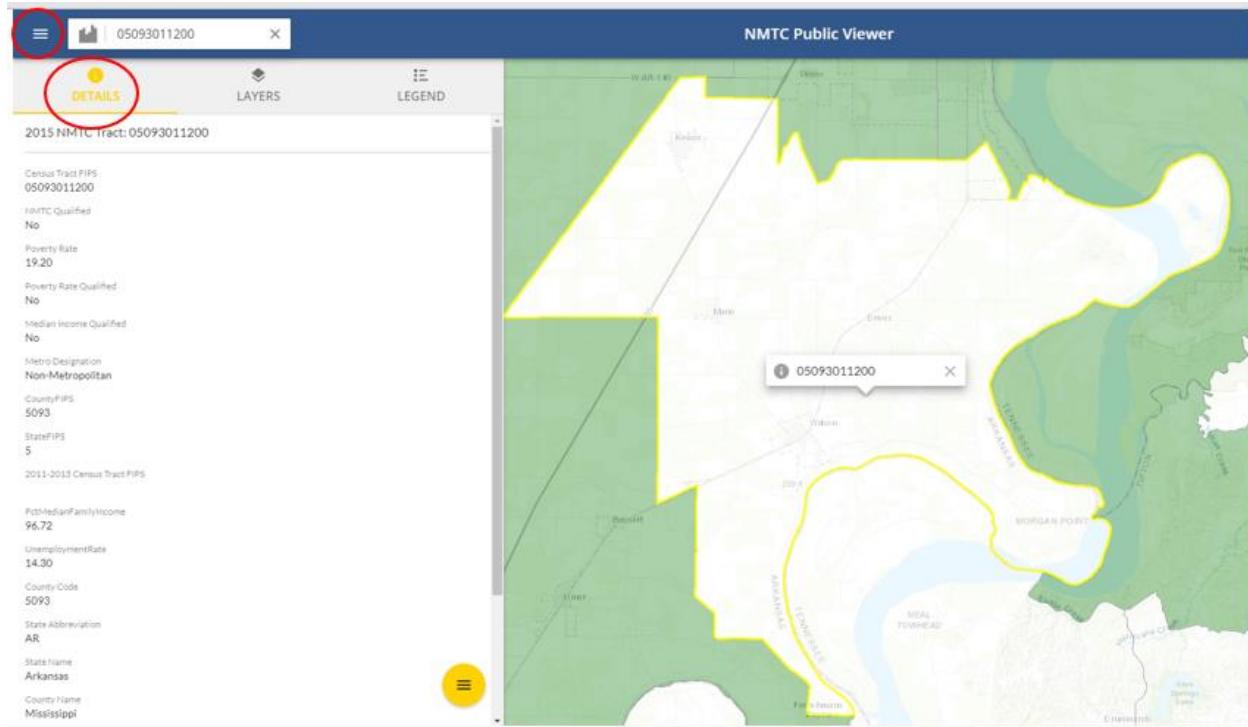

5. Click on the mailbox icon to the left of the search box. This will display a list of search options.

6. Select the '2015 NMTC Tract' option and enter the 11 digit FIPS code you are looking for.
7. Press Enter on your keyboard.
8. Select the FIPS code that displays under the search box.

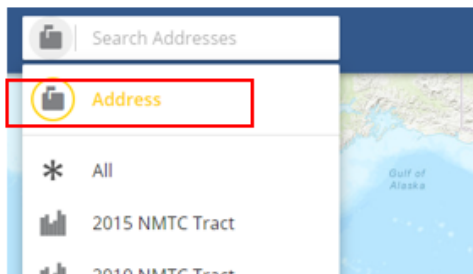

9. CIMS will display a map and characteristics of the selected FIPS. Note that you may need to open the left-hand navigation (three-line icon to the left of the search box) and click on the Details tab to see the FIPS' characteristics.

If you don't know the FIPS Code, you can use the Address, County, or State search options to find the FIPS code for a specific area on a map.

A street address will return the most exact location

1. Select the Address search option

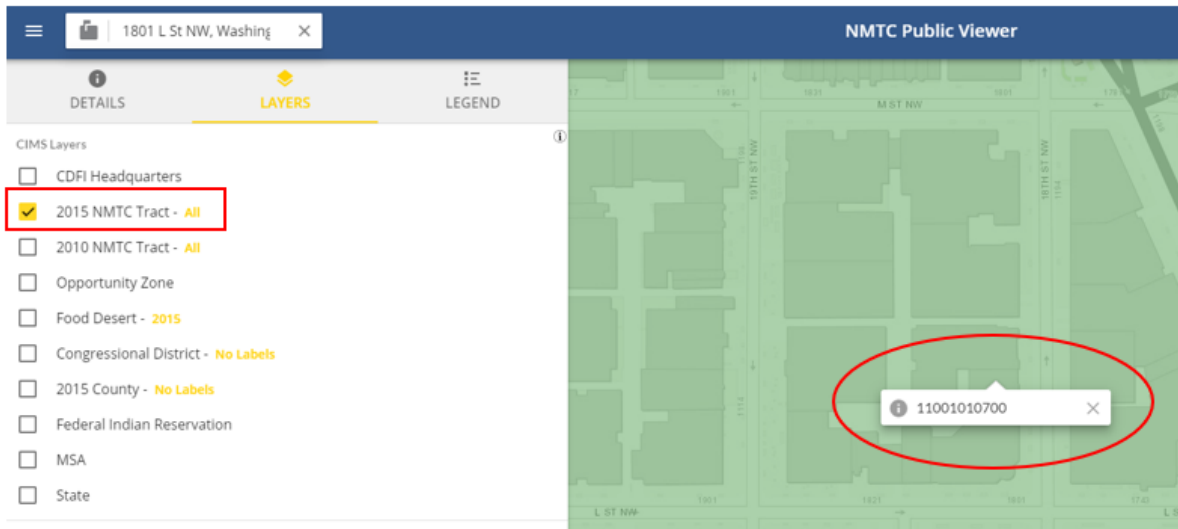

2. Enter the full address in one line, for example "1801 L St NW, Washington, DC, 20036"
3. Press Enter on your keyboard
4. Select the Address from the dropdown

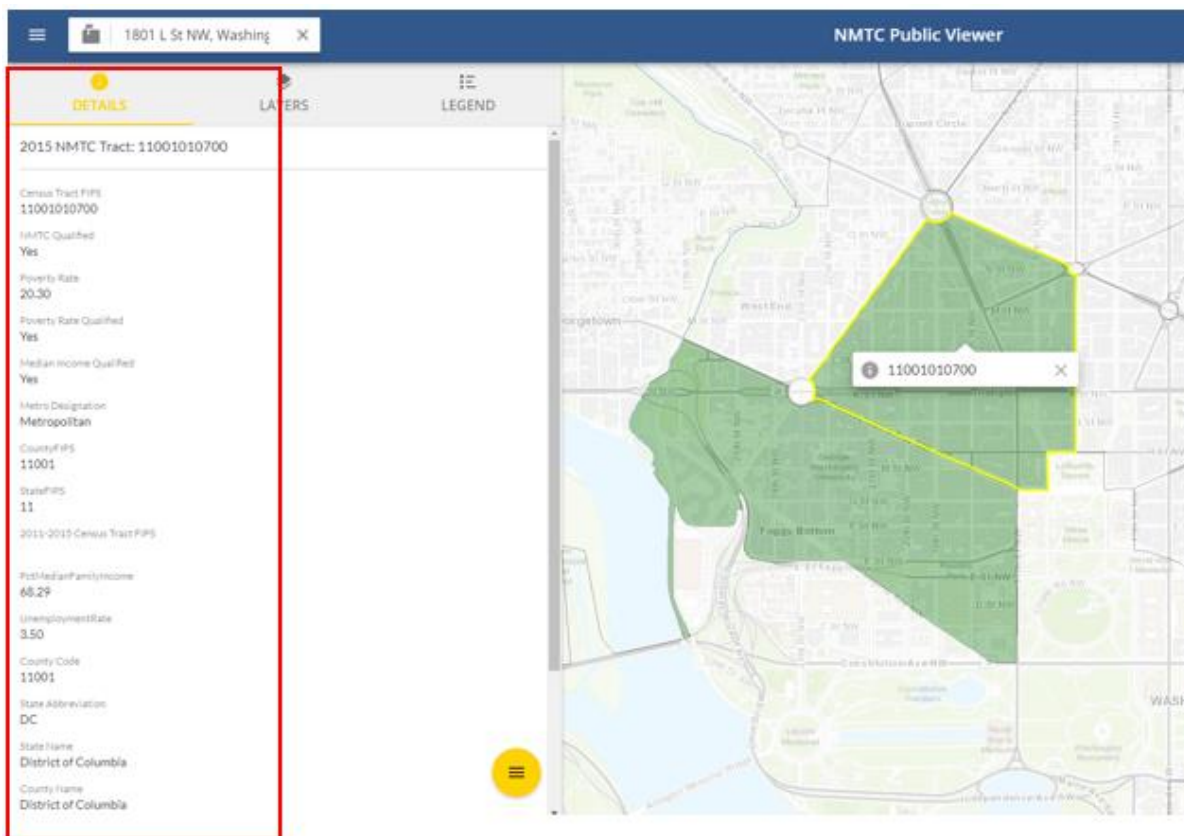

5. CIMS will display a map of the specific street location.

6. Click on the Layers tab in the left-hand navigation and select the '2015 NMTC Tract' option.
7. Right click on the map and you will see the FIPS code.

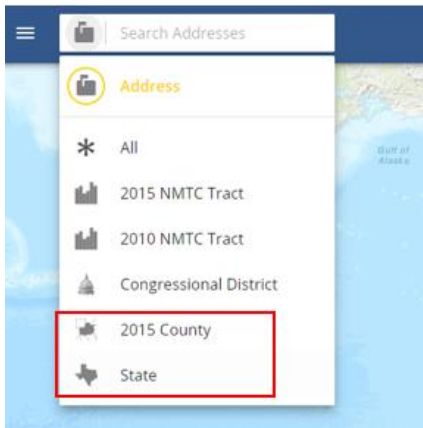

8. Click on the Details tab and the characteristics for the FIPS code will display
9. Zoom out a bit and you can see the whole FIPS code area.

**Finally, a county or state can also help you find a FIPS code if you do not have a specific address**

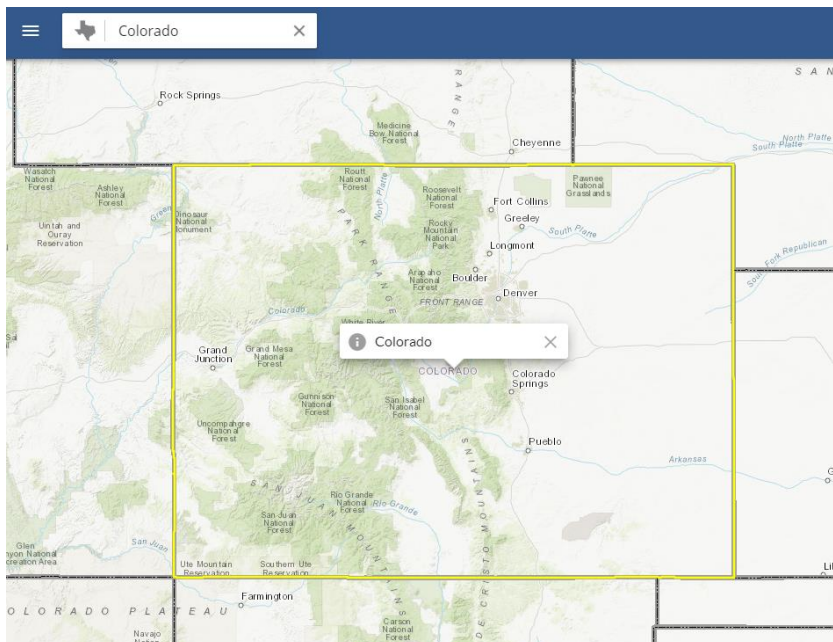

1. Select either the county or state search options

2. Enter the name of the county or state
3. Press Enter on your keyboard
4. Select the name from the dropdown

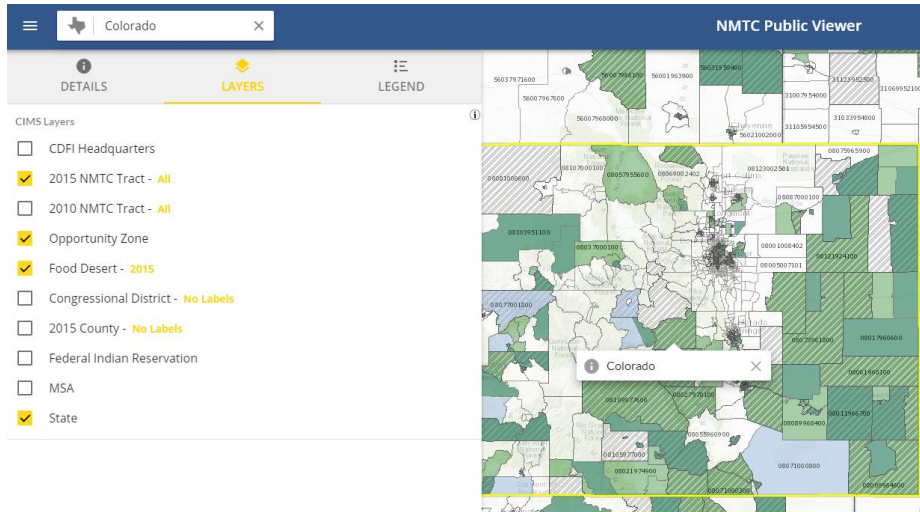

5. CIMS will display a map of the county or state

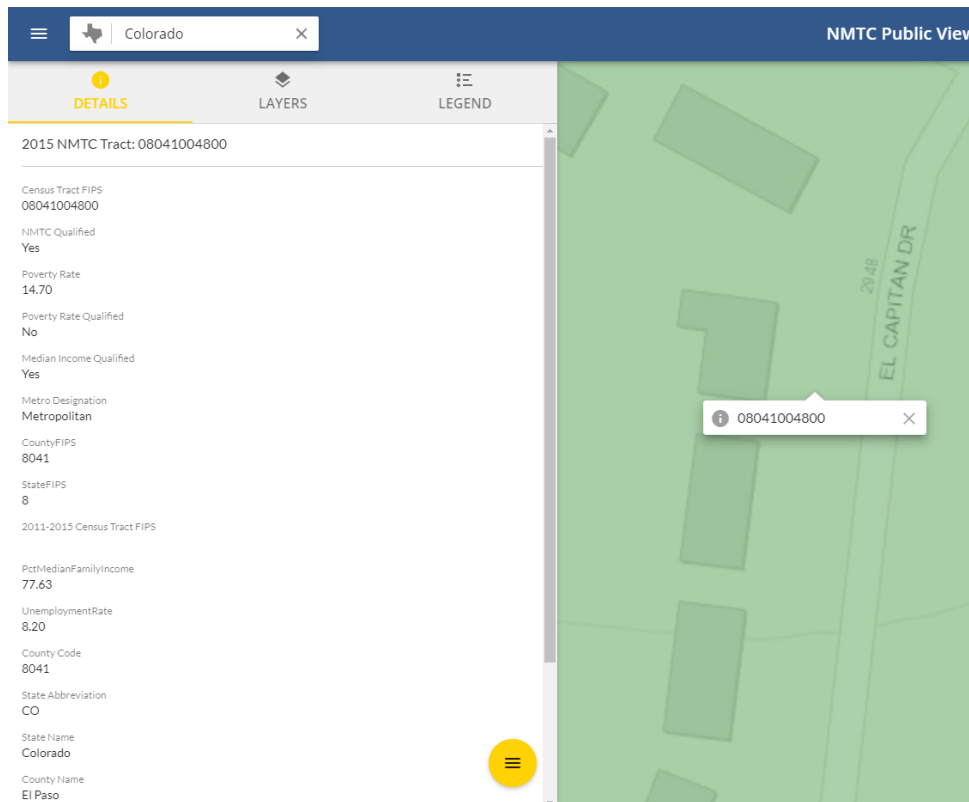

6. After the map is displayed, use the left navigator and Layers tab to identify the characteristics of different tracts.

7. Zoom into the map to establish the project's location, using the street grid or other map features as a guide.
8. Click on the map to identify the census tract. The FIPS Code will be displayed in the pop-up box. The census tract characteristics will display under the Details tab in the left-hand navigation.

# Loan Source and Disbursements

The Loan Source section in AMIS collects data previously reported in the QEI Distribution Report in CIIS. This includes data related to the source of QLICI funds (i.e. QEIs/RQIs used and amount used from each QEI/RQI) and disbursement information (i.e. amount of disbursement(s) and date of disbursement(s)).

Loan Source information is required.

AMIS now allows the users to report Loan Source and Disbursements information via CSV and XML upload.

Various warnings and validations rules are built in to the Loan Source user interface in AMIS to ensure that loan source and disbursement data is entered accurately. In the case that a Loan Source is entered with inconsistent values, the user will not be able to save the data.
