Organizational Development Framework

- Four stages of Organizational Development
 - Based on Greiner, Thomas & customized to CDFIs
 - Provides a roadmap to organizational change as you grow
- The OD perspective: *Internal organizational history, structures, and practices have as much to do with success as external forces.*
 - CDFIs' focus on market is critical, but we must tend to the organization itself if we are to accomplish our goals

OD Framework

- Periods of *evolution* and *revolution*
 - *Evolution*: no major changes in organizational practice or structure
 - *Revolution*: change the way you do business
 - Growth occurs in both phases
 - Each phase builds on the prior one; yet the solutions for one phase will not work in the next one. Reinvention is key to growth.

Stages of Growth: Caveats

- It is not inevitable that an organization will move from one stage to the next.
- This is not a race to get to stage 4; organizations should strive to have an organizational structure that aligns with their programmatic complexity .
- Generally, not all aspects of an organization will be in one stage. The aspects that are lagging will be stressful.
- The roadmap helps a leader know what to expect as the organization enters a revolution period.

In Any Stage . . .

- There are three legs to any organization's stool:
 - Human Resources (Staff and Board)
 - Financial Resources
 - Systems and Policies
- And for a CDFI: market analysis leading to a product / program that sells
